HOW THE COURSE WORKS · 8 MODULES · 20 HOURS

# Course roadmap

- 01** Get Started with Claude
- 02** Master the Claude App
- 03** Prompt Like a Pro
- 04** Put Claude to Work
- 05** Automate with Claude Cowork
- 06** Build with Claude Code
- 07** Build Real AI Apps
- 08** Ship and Earn

Modules 1 to 5 and 8 are for everyone. Modules 6 and 7 are for those who want to build with code.

MODULE 1

# Get Started with Claude

CORE For everyone · 1.5 hours

01

MODULE 1 · WHAT YOU WILL BE ABLE TO DO

# By the end of this module

- Explain what Claude is and why it matters
- Set up your account and pick the right plan
- Finish your first real task with confidence

## LESSON 1.1 · THE COMPANY

# Who makes Claude?

- Anthropic, founded in 2021 in San Francisco
- Started by researchers who left OpenAI over safety
- Their mission: build AI that is safe, reliable, and good for people

## LESSON 1.2 · WHAT IT IS

# More than a chatbot

- Trained to be helpful, honest, and harmless
- Not just an answer box, a **thinking partner**
- Strong at writing, summaries, planning, and reasoning
- Like a smart teammate who needs clear direction

## LESSON 1.3 · WHY IT MATTERS

# What can Claude do for you?

- Write and fix your emails
- Read a contract and explain it plainly
- Analyse a spreadsheet and spot trends
- Study and explain hard topics
- Summarise long reports in minutes
- Turn a meeting transcript into action items
- Plan a trip or event on a budget
- Research a topic with real sources

LESSON 1.4 · SEE IT IN ACTION

# Plan a weekend trip to Lahore

- A day by day plan with real travel times
- Opening hours and local food spots
- A budget you can actually follow

DEMO · WATCH HOW YOU WORK WITH A THINKING PARTNER

# How to work with your thinking partner

Four habits, using that same trip:

- **Delegation** hand the trip plan to Claude
- **Description** "two days in Lahore, four friends, budget twenty thousand, we love food and history"
- **Discernment** judge it: are the timings realistic, is it on budget
- **Diligence** verify the hours and prices, then use it

## LESSON 1.6 · FOR YOUR WORK

# The four habits fit any job

- **Student** plan your exam week, then check the dates
- **Business owner** turn notes into an SOP, then verify the figures
- **Teacher** draft a lesson plan, then fit it to your class
- **Finance** analyse a spreadsheet, then check the totals

LESSON 1.7 · GET SET UP

# How to get Claude

- Go to [claude.ai](https://claude.ai) and click Sign up
- Use Google, Apple, or email. No credit card needed
- Works on web, desktop, and mobile, all synced

DEMO · LIVE SIGN UP AND APP INSTALL

# Free, Pro, or Max?

- **Free** capable, with Projects, files, and Memory. Limits are low
- **Pro** about twenty dollars a month, roughly five times more, the daily work pick
- **Max** about one hundred to two hundred a month, for heavy all day use

Start on Free, upgrade when the limits get in your way.

## LESSON 1.9 · YOUR TURN

# Your first real task

Start with one tiny goal you can win in two minutes.

- "Summarise these notes in five bullets"
- "Rewrite this paragraph so it is clear"
- "Write a polite leave email to my manager"
- "Plan a one day trip on a small budget"

| HABIT IN FOCUS · DESCRIPTION, BEING SPECIFIC

# Get much better answers

Most weak answers are not Claude's fault. They are missing context.

- Vague: "Write an email about the project delay"
- Clear: "Email our client that the launch slips two weeks. It is the second delay, so stay professional but apologetic"

Two more moves that fix almost everything:

- Show an example of what good looks like
- Iterate, do not restart: "make it shorter and warmer"

LESSON 1.11 · STAY SAFE

# Using Claude responsibly

- Never paste passwords, secrets, or private client data
- Verify facts and names before you rely on them
- Cite honestly, and own what you send

▮ HABIT IN FOCUS · DILIGENCE, OWNING THE RESULT

LESSON 1.12 · KEEP GOING

# Practice, and what is next

- Your turn: which task in your week could Claude take first?
- Next: Module 2 makes you fluent in the whole Claude app

## MODULE 1 PROJECT

# Plan your own trip with Claude

Use all four habits: delegate the plan, describe what you want, judge it, and verify the details.
